

I am an undergraduate of IIT Kharagpur and currently looking to pursue a career in the field of Software Technology. My passion for technology stems from my enjoyment in creating usable and functional websites. I believe that my background and skills make me an ideal candidate for the Developer Engineering position .

Experience: In addition to having a strong educational background, I have gained valuable experience through my internship at ChiSquare Company and BabyCode. The skills that I developed include:

Working knowledge of Linux and UNIX environments , VMware, Amazon AWS, Microsoft Azure, Jenkins CI server, and Chef servers, Youtube API
Managed multiple websites using Django framework and Bootstrap for responsive UI design

Thank you for your time reviewing my resume and cover letter. I look forward to furthering our conversation regarding the Developer position .
